

# The Roundtable for Contractors

presented by Planet Underground

**March 26, 2026**  
**HBK Engineering, Chicago IL**

We're happy to partner with HBK Engineering to host another Roundtable for Contractors event in Chicago, March 26th 2026. We are calling all Chicagoland contractors, locators, and any other stakeholders in the industry to join in on some unscripted and honest conversation.

We created this event to give utility contractors a platform to share their experiences from out in the field, because people don't often hear about what they have to say. Peer to peer interactions are what keep this system running smoothly, so join a Roundtable session, or come and join the audience. We promise you will learn something!
