Global Damage Prevention Summit Nashville, TN

Planet Underground is excited to host a special "All-Star" panel at the Global Damage Prevention Summit in Nashville, TN on August 18th. We are looking to assemble a super-star group of utility pros for this event, so represent your stakeholder group as one of the six panelists on what will be one of our best Roundtable panels yet!

Panel Topic: Are We at a Tipping Point? Ideas for System Change

The 2026 NULCA White Paper is titled, "The System is Designed to Fail. We're Done Pretending Otherwise." The CGA has stated the 50 in 5 goal has failed, and something needs to change. Planet Underground has been echoing this for many years. So, have we finally reached the tipping point where something actually changes in laws, enforcement and overall restructuring of the entire 811 system? This would be a complex task, but we've heard many ideas that could potentially work from Roundtable panelists like you. Make your voice heard!
